Lokalita	Hvar
Druh	starý kamenný dům
Cena	49.000 €

## Opis nemovitosti

---

We have this rebuilding project of two old stone house/ruins in need of complete reconstruction, in an attractive hamlet at the very heart of the island.

One cottage is without a roof, and it has only exterior stone walls. The other house has a roof which is still intact, but might still need replacing.

The houses can be physically linked so that they can become a substantial family holiday villa.

- there is access by car for unloading etc, and longer term parking nearby.
- 5km from the sea and the beach
- to the biggest town 5km
- water and electricity right up to the house.

Once this has been restored there will be a beautiful modernised house in a charming and peaceful location, an area ideal for walking or cycling, and discovering the hidden inland and pristine countryside of Croatia's sunniest island.

There are a few konobas in these hamlets which offer traditional Croatian food.

For an agreement about seeing this and similar renovation projects on the island of Hvar, we are at your disposal in the Hvar CPS office.
