Opis nemovitosti

Old stone house in the center of the village with beautiful sea view.

The house needs complete reconstruction, and is located on the south side of the island of Hvar, on a hill from which it is impossible to obstruct the view.

The village has electricity, but it would be ideal to make solar collectors and thus provide electricity.

There is no water supply network in the village yet. The house cannot be reached by car, instead it needs to be parked nearby in the free public parking lot.

There is plenty of space in front of the house to make a pool, and the house itself can be expanded.

For any questions, please contact our CPS office on Hvar.
