## Immobilienbeschreibung

---

Renovated, old stone house in the center of a small fishing village.

The house has 48 m2 of living area and consists of ground floor and two upper floors.

On the ground floor there is a kitchen with a dining room, on the first floor there is the living room, and on the second floor is a bedroom with a bathroom. All floors are connected by a wooden staircase.

When renovations were made, the original appearance and materials were retained as much as possible, and wooden floors, which were conserved and reinforced with metal decorative supports, were retained.

The ground floor is less than the standard height so it can be used only by people not higher than 190 cm. The rest of the house is of standard height.

The roof consists of stone slabs, well protected and coated with adequate material.

The house is adapted to the present time and has all new installations and appliances.

For further questions please contact our CPS office in Split.
