Immobilienbeschreibung

Large building plot in an excellent location in a small picturesque small town.

It is located in a quiet environment. It stretches all the way to the sea, a small pebble beach.

All the necessary infrastructure is located near the plot.

It is possible to build more buildings on the land in accordance with the wishes of investors.

So far, no building permits have been obtained. It is located partly in the regulated and undeveloped part of the construction zone, where it is possible to obtain building permits immediately, and partly in the undeveloped part, which requires the preparation of an urban development plan.
